

How to Change Your Database Password

Click on the **Change Database Password** icon in the Applications window. The Change Database Password tool is also accessible from the LOJIC Tools toolbar from within an ArcMap mxd file.

When the **Change Database Password** window appears make sure the Select Database is "lojicora1". Enter your Database User Name, your old Database Password and your new Database Password. Click the **OK** button to activate your new password.

Important: Changing your Database password does not change your LOJIC Virtual Network password.

A screenshot of the "Change Database Password" dialog box. The window title is "Change Database Password" with a close button (X) in the top right corner. The dialog contains the following fields and controls:

- "Select Database:" with a dropdown menu.
- "User Name:" with a text input field.
- "Password:" with a text input field.
- A text box containing the instruction: "First Character of the password should be a letter and then any alpha-numeric combination is allowed... e.g. A12b34c56".
- "New Password:" with a text input field.
- "Confirm Password:" with a text input field.
- At the bottom, there are two buttons: "OK" (with a key icon) and "Cancel" (with a door icon).
